

## Verbatim Feedback to Grassland Enhancement Proposal

### 1. What do you like about the proposal?

Love it.

It will look lovely, and it will enhance the look of the area.

All wildflower areas are good.

The Concept.

More wild meadow for the bees.

Good for the village.

Good to see wildflowers across the village, the sites would benefit from being used purposefully.

Brilliant enhancement to the local area.

The fact that we are even trying as a village! I don't think it will be easy but every little helps the wildlife, I believe.

It's brilliant.

Improving the diversity of grassland by active management. Planting more trees/hedgerows. Habitat creation through hibernacula and bare ground etc.

Excellent.

Will attract additional wildlife eg insects, birds as well as visually appealing.

### 2. Do you have any concerns about the proposal and if so, what would they be?

None x 8

The upkeep and maintenance. Will it be volunteers or council?

Needs to be planted and looked after.

Yes, how will it be implemented, and who will manage it? All the weeds and dandelions will need to be removed. I have seen some lovely examples of wildflower areas. Access issues across the common.

Slightly worried about the "untidiness" – very English in that regard; but it is a small price to pay. Diversity is more important.

Yes I think tree planting on the area by Mosey More should be actively considered – not needed as open space for recreation. Don't think it should be fully wooded, but some scattered trees.

None. DWT are the best for getting advice for proceeding.

**3. Would you be willing to volunteer to help out on the project?**

11 of the 14 residents who replied would be willing to help, ranging between administrative help for those with physical limitations, to more physical work and planting.

**4. Do you have any specialised equipment?**

1 resident has a scarifier.
